PROGRAM FOR BIG TOBACCO FAIR HAS BEEN ANNOUNCED

Special Days During the Week of the Corn and Tobacco Fair Are Designated—Booth Owners Getting Ready for the Show.

The five big days of the Corn and Tobacco Fair which opens at the Liberty warehouse on next Tuesday have been designated as special days by the managing committee of the American Legion in charge of the fair and its arrangements.

On Tuesday of next week the annual session of the Kentucky Grand Lodge of Odd Fellows will be opened at the Washington Opera House and in honor of the visiting Odd Fellows from all parts of Kentucky Tuesday has been designated "Odd Fellows' Day." The entire program as planned follows:

Tuesday—"Odd Fellows' Day."

Wednesday—"Red Cross Day."

Thursday—"Ohio and Kentucky Day."

Saturday—"Maysville and School Day."

Owners of booths at the big fair have begun already to decorate and get things in readiness. So early this year have the owners been assigned their location that it is not expected that there will be any delay. When the fair opens on Tuesday it is expected that all of the booths will be completely arranged and ready for the big doings.

BRACKEN MAN DIES IN AUTO ON WAY TO POLLS

Mr. Charles Pumppelly, Prominent Citizen of Brookville Died Suddenly in Automobile On Tuesday.

The Augusta Chronicle says: Charles Pumppelly, aged 35 years, died suddenly at Brookville Tuesday morning, November 8, at about 8:30. Mr. Pumppelly was driving an automobile, working at the polls, and had three colored women in the machine on the way to vote when he was stricken with heart trouble. The colored women say that shortly after the auto started to the polls that Mr. Pumppelly began to lean back in the seat, and they are satisfied that death occurred at this time, as he lost control of the auto and the machine ran into a fence near the Catholic church, but the auto was not damaged, neither were the occupants injured. Mr. Pumppelly was dead when friends reached his side. Deceased was a son of the late A. A. Pumppelly, of Mason county, and lived between Brooksville and Germantown. He was married and had one son. Funeral services Thursday at 2 p.m.; burial in the K. P. cemetery.

Never in the history of Furs have they been sold at prices as offered by the Montreal Fur Company at our store on Thursday, Friday and Saturday. Merz Bros.

"GLAD TO SEE YOU."
I appreciate the splendid vote I received from the voters and grand old Maysville, and assure you will do my best to elevate the children in the schools of our city. Will always be "Glad to see" the patrons of the schools at our regular board meeting. I again thank you for your vote.

CONFESSED MURDERER'S MOTHER ATTEMPTS SUICIDE

Mother of Shamblin Tries to Take Her Own Life at Her Home At Manchester.

The Manchester Signal says:

Roy Shamblin visited his mother, Mrs. Eva Easter-Parks at Manchester twice after the 21st of November, he did not confide with anyone regarding any pending trouble. He was shaved by Henry Edgington but did not indicate anything unusual in his manner.

Mrs. Parks after having the details of the double murder recited to her at her front street room, collapsed and later attempted self-destruction with a razor. Friends who interfered said that she seemed determined and that her mental condition was pitiful on account of loss of sleep after the awful condition of her son.

All of Roy Shamblin's home ties are about Manchester notwithstanding his absence from here in recent years; many friends refused to believe his confession at the first reading; Wednesday Mrs. Parks was with friends at West Union.

FRIENDS THANKED.

I desire in this manner to thank thy friends who supported me in my race for Councilman by casting their vote for me on Tuesday. It was a good clean vote and although defeated, I appreciate the support of my friends.

WORLD'S HOPE OF LASTING PEACE IS VOICED AT BIER

President Harding's Oration at Grave of Unknown Hero Voices the Hope of the Entire World for Peace Throughout the Future.

Amphitheater, Arlington National Cemetery, Nov. 11.—The commanding voice of the world was summoned to a crusade agaist armed warfare by President Harding as he stood at the bier of America's Unknown Dead.

"His sacrifice, and of others of the millions dead, shall not be in vain," the president promised in a solemn vow that rang out over the silent mourners in the vast amphitheater.

"There must be—there shall be—the commanding voice of a conscious civilization against armed warfare."

President Harding addressed his measured words directly at the disarmament delegates, who sat grouped in front of him.

Then, with tender tribute, he swung into the climax of his oration.

"As we return this poor clay to its other soil, garlanded by love and covered with the decorations that only nations can bestow, I can seize the prayers of our people, of all peoples, that this Armistice Day shall mark the beginning of a new and lasting era of peace on earth, good will among men."

Holding reverently over the casket, the president, with the vast audience listening softly, offered up the Lord's Prayer as he closed his address.

"I speak not as a pacifist fearing war, but as one who loves justice and peace," Harding asserted in voting his resolution that civilization must make a supreme effort to end war for all time.

PLANNING FOR BIBLE CONFERENCE IN MOUNTAINS.

Burley tobacco of previous year's crop sold during the month totalled 36,525 pounds which brought \$2,781.75, an average of \$75.58 a hundred.

Sales of one-sucker tobacco of previous year's crops were \$4,465 pounds which brought \$298.56, an average of \$52.52. There were no sales of one sucker tobacco of the 1920 crop reported. No sales of unfired tobacco or Green River tobacco were reported during the month.

REV. SEEVERS SPEAKS TONIGHT.

A large and appreciative audience heard the Rev. Fred Tilley at the Win-Mc-Chum-Week service at the Third Street M. E. church Thursday evening.

The speaker's vivid illustrations of his experiences in the British army during the World War, deeply impressed the audience for the evening.

"Following Christ, My Contribution." These services are proving very enjoyable as well as helpful to the spiritual life of the league.

The Rev. O. C. Seevers, pastor of the First M. E. Church, South, will be the speaker for this evening. Subject, "Why I Ought to Follow Christ." Special music by male quartet. Service begins at 7:15.

HENRY FORD, DREAMER AND MAN OF ACTION.

Except only the men whose official doings of various kinds keep them constantly before the public, like President Harding or Mr. Lloyd George, it is usually some one thing that brings a private person into the glare of publicity at a particular moment. Henry Ford is an exception to this rule. Four or five different matters not related essentially to one another, have given Mr. Ford his place in front page headlines during the past few weeks.

One of these relates to the end of his contest against Mr. Newberry for the Michigan Senatorship. Another relates to his remarkable experience in reaching the maximum output of Ford cars when most manufacturers were still running on part time. Another topic of general comment has been Mr. Ford's experience in the ownership of a railroad several hundred miles long. But in certain quarters, the most interesting of Mr. Ford's recent activities has been in connection with his plans for the development of the Government's unfinished work at Muscle Shoals, Alabama.

During the war, the Government decided to create a series of water powers at Muscle Shoals, with an approximate capacity considerably greater than that which is harnessed at Ningara. This water power was to be used principally for obtaining nitrogen from the air for explosives in war time and for fertilizers in time of peace.

Mr. Ford's offer has been under serious consideration at Washington with the prospect that it will be accepted. In view of Mr. Ford's various activities, the editor of the Review of Reviews sent the noted writer, Judson Welliver, to Destroir to spend some days with Mr. Ford, to learn at first hand his plans and ideas, especially with regard to Muscle Shoals and the future of American agriculture. Space doesn't permit a resume of Mr. Welliver's article but country people will be interested in the most significant of the writer's impressions as follows:

Mr. Ford, with all his dreams and visions, loves most to dwell upon the future of American agriculture. He wishes to help emancipate the farmer and the farmer's wife from at least two-thirds of their present drudgery.

His opinions on the elimination of live stock, including the dairy cow, will not, perhaps, be taken very seriously. His firm belief, however, that there is an immense field for the use of mechanical appliances, with electrical power or with cheap substitutes for gasoline, is in accord with evident tendencies. Hence his desire to develop Muscle Shoals.

Mr. Ford is a dreamer, but he is also a man of action whose achievements have been so remarkable that he is sure to find the country readily interested in his points of view, however fantastic some of them may seem.

WILL WE ALL MAKE OUR OWN GOLD IN TEN YEARS?

Our high school boys have been told that the atom is the base of all matter, of all substance. It is an infinitely small critter, this atom, but everything in the world, and the world itself, are built up of it, fabulous numbers to every cubic inch. But nobody has ever yet penetrated to the heart of an atom; it is still a riddle.

Now you wouldn't think that such an insignificantly tiny thing as an atom would worry anybody, but it actually does worry the world's greatest financiers, especially our own Wall Street millionaires, because—

SCIENTIFIC CHEMISTRY IS GETTING TO KNOW TOO MUCH ABOUT THAT SAID ATOM!

The chemists are solving its riddle. Within ten years they have cleared up many of its secrets and the prediction is freely made by learned scientists that in another ten years they will have learned the structure of the atom and will be able to make any element desired at will.

If they learn the exact composition of the atom they will be able to make granite or coal, tin or rubber, lead or—yes, GOLD!

That's the point—that's what makes the multi-millionaire shiver, because if gold can be manufactured at will in a laboratory, his fortune when based on gold, will probably become nothing but a wisp of the wind.

On the other hand, the man whose wealth is in land, buildings and livestock, will get off easier.

IDEALS IN COMMON.

The visit of President Harding to Birmingham is another strong influence toward the unification of the North and South. Birmingham is essentially an industrial city, and many other southern communities are following her lead as manufacturing enterprises are established. The aims and ambitions of the industrial North are fast becoming the ideals of the South. Then, too, the vote of last year showed that there was wide-spread disgust throughout the South at the Wilson policies that had dominated the country for so long. The leading minds of that section are aware of the folly that put Mr. Wilson in the White House and kept him there so long. They are in a receptive mood to join their influence with another political party that offers safe and sound government, including protection for the young industries that are springing up all through the South. Mr. Harding is the man who, by words and actions, can extend the most effective invitation to the Southerners to come into the Republican fold.

GOAT GLANDS?

A campaign is under way in Chicago to put mentally deficient children on a diet of sheep's glands to stimulate the activity of their brains. But if the Democratic tariff law continues in operation much longer we will have to go to Australia or Argentina to get the sheep. Who wants an American child fed on foreign sheep's glands? World War offers goat substitutes!

Boston Transcript—"Let's go," was the war-time phrase. "Let's go to work" might appropriately be made the peace-time version.

WHAT HAS GREATER
BIG ARMAMENTS!

By Sidney L. Gulick, Secretary, Commission on International Justice and Goodwill Federal Council Council of Churches.

Washington.—Why do nations go to war with the people of every land and urge hate war, and why do people stagger under the burdens of armament when they do not want them?

The modern causes direct and indirect are many and intricate, though they have also been quite natural. We must go into them thoroughly if we are to understand them. Among them are some of the things that have meant most in the advancement of civilization—science, steam and electric power, control of disease, and transportation. The creation of wealth and massing of capital have played a part. Secret diplomacy, suspicion and fear have also done their part.

To establish eventually a warless world, with a mutual reduction of armament as the first step, we must face the facts and all the facts. It is not enough to say to the nations—"Be good." We must find out what it is to be good in this modern world and we must establish suitable international agencies so that we can be good. We must do much hard-headed, cold-hearted, clear-minded and creative thinking.

In connection with this question of armament one may well ask, "Will Germany win the war after all?" Being compelled to discern, she has stopped her bloated budgets for armaments. Her yearly payments for reparations are less than what either France, England or America elected to spend the past year on their respective armaments. Germany is hard at work producing, the sure and only road to recovery and prosperity. England, France and America are still lagging in production and at the same time are wasting enormous sums maintaining their armament programs.

The principal direct and indirect causes of big armaments, and also of the recent world war, are the following:

First, science, steam and electric power and standardized production by machinery, have given the advanced nations extraordinary powers of expansion and aggression.

Second, creation of wealth and massing of capital, control of disease and increase of population, with demand for more food and for abundant raw material, have caused the progressive nations to reach out long arms into all the world.

Third, the existence of many absolutely independent sovereign governments, each responsible only to its own people for their welfare has led to conscious and scheming rivalry and the adoption by several governments of the policy of economic imperialism. By diplomacy, intimidation and intrigue they have sought for expansion of commerce and for the political control of those backward geographical areas on which they were, or expected to be, dependent for food and raw material.

Fourth, suspicion and fear of neighbors have led each government to build up its own defensive system. This practice antedates, indeed, in man history. But it has reached modern proportions because the discoveries of science have been effectively utilized.

Fifth, the massing and mobilizing for war of the entire power of each nation has become possible by popular education, growing nationalism, increasing political centralization, and growing interrelation and co-operation of commerce, industry and politics.

Sixth, acts of one people or government with no thought or intention of ill-will, have often brought harm to neighboring nations, arousing feelings and acts of retaliation growing into settled and mutual hostility.

Seventh, the modern system of finance has enabled governments through loans and credits not only to utilize to the full existing wealth, but to discount and mortgage their futures and thus to create big armaments otherwise impossible.

Eighth, the modern system of treaties, open and secret, have produced groups of "powers" committed to assist each other under certain contingencies, thus increasing fears and suspicions and making swollen war budgets inevitable in every land.

Ninth, vast private manufacturing enterprises, producing munitions and other materials needed by armies and navies have deliberately cultivated international suspicions and fears for purposes of private gains.

Tenth, a materialistic, unchristian philosophy, justifying the right of strong peoples to take and to dominate the earth, has stimulated selfish nationalistic ambitions and rivalries. The doctrines that mere might gives right, that moral laws do not bind nations; that the weak must go to the wall; that vultures may ignore the needs of the vanquished and may exploit them and their resources—these inhuman doctrines of materialism have led to vast national crimes, and to deep-seated hatreds and plans for revenge.

of the vanquished, if not positively to win the prize of the victor, has been a mighty modern cause of superarmaments.

Twelfth, the people of every land and age hate war. Wars have come however because people have usually been misinformed by the ruling classes. The real and full facts in the case are seldom told them. The issues are more or less falsified in order to arouse the power of enthusiastic patriotism. Even where they partly know the facts they have no adequate machinery for the control of ambitions or scheming political leaders.

GRAND JURY DROPS
RAINEY INVESTIGATION

Find of Coroner's Jury in Rainey Case Is Endorsed By the Grand Jury.

Lexington, Ky., Nov. 10.—The grand jury investigation of the circumstances surrounding the death of Miss Dorothy Rainey, of Newport, who was killed in a fall from a fifth floor window of the Lafayette hotel shortly after midnight, October 25, was dropped after several witnesses had been quizzed regarding the affair, it became known today.

Court Attorney Hogan Yancey and Colonel John Skain, foreman of the grand jury, said the matter was gone into thoroughly and that it was apparent from the testimony of eye witnesses that no responsibility for the young woman's death could be attached to any individual; that according to the testimony given before the grand jury, the young woman climbed out of the window, feet first, and hanging a moment to the window ledge with her hands, plunged to the pavement five stories below.

The verdict of the coroner's jury the day following the woman's death, was that she met "death from injuries sustained by accidentally falling from a window of the Lafayette hotel."

MORRISON FAILS TO GIVE BAIL.

The Fleming Gazette Says.

The Arthur Morrison murder case was called in circuit court here Wednesday afternoon, and on account of absent witnesses was continued until next term.

On motion for bail the court heard testimony from two of the leading witnesses and granted permission for bail in the sum of \$10,000. The prisoner was unable to give it and was remanded back to jail.

The court house was filled when Morrison's case was called. The prisoner appeared in good spirits and did not look to be the desperate character that his past life would indicate. For the killing of Will Collins, he will file self defense. The numerous liquor charges against him will not be tried before the murder charge is disposed of.

BONUS WINS IN OHIO.

Columbus, Ohio, Nov. 10.—Ohio showed emphatically in Tuesday's election its appreciation of the sacrifices of its World War veterans by adopting the soldier bonus amendment to the state constitution by a majority of fully 500,000.

At the same time, by a majority of about 500,000, voters declared their opposition to a poll tax and by about 400,000 majority their opposition to the senatorial redistricting amendment.

Mrs. William Farley, 128 East Second street, says: "Not long ago I used Doan's Kidney Pills and they did me a world of good. I am pleased to recommend them. My back hurt nearly all the time and I couldn't bear my washing on account of the misery in my back. I couldn't sleep at night and mornings I could get up feeling all right. I would be dizzy and could see black specks before my eyes. My kidneys didn't act regularly and in other ways showed signs of disorder. My hands and arms would get numb and cold. New York Letter

by Lucy Jeanne Price

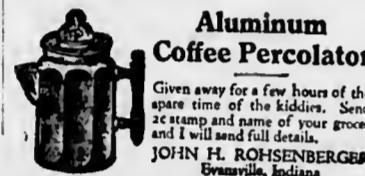

New York.—The Battery is accustomed to a wide field of strange sights and sounds. It is a gathering place for sailors from all parts of the world and for those with whom they congregate when they touch our shores. But even the battery was aroused to interest the other day when from somewhere in the air above its benches and sea wall came a hoarse cry, "Have some coffee! Have some coffee! WANT some coffee!" Finally the source of the call was discovered. In the topmost branch of the tallest tree of Battery Park was perched Polly, a pet parrot escaped from the Broad Street Hospital a few blocks away. A reward of \$5 was offered for the recovery of the wanderer and every wren in the park proceeded to wear out his trousers in an effort to climb the tree. After 24 hours of mournful freedom and incessant appeals to "Have some coffee!" Polly left her perch of her own free will and found her way back to her hospital cage.

One good million dollars was of-

fered to Mrs. George J. Gould if she would follow the example set by a few other social lights and act for the silver screen. Mrs. Gould, however, not only is in a position to scorn a million, but evidently hasn't the slightest ambition to display her talents and her charm for motion picture audiences, and the ambitious producer was unable to persuade her. Mrs. Gould has appeared in the films taken at Georgian Court, the Gould estate, which are shown in her private theater in the great Lakewood establishment, and it was the excellence of her acting in them that led to the offer.

great mahogany desk at 18 East Forty-first street, and handles practically all the details of the Commonwealth Hotel Construction Corporation, the great \$15,000,000 co-operative organization which is building the hotel. Since 1917, Mrs. Merrill has been on the job and during these years has recorded and kept track of more than 2,000 persons, all part-owners in the hotel, whose subscriptions total more than \$5,000,000. All the important documents are in her charge, all literature of the corporation must receive her final o. k. before it is sent out, and all correspondence is handled by her before the most vital of it reaches the desk of W. J. Hoggson, chief executive of the enterprise. Considerable of a job for a woman—or a man! And Mrs. Merrill certainly carries it through. When she was asked how she did it, she explained quite simply, "Oh, there's no mystery about it," she said. "When I started in business, I made it my rule to obey orders and carry them out to the best of my ability. That's all there is to it."

—NY—

While I'm boasting my sex, I can mention that another woman has found a place in the business world of man's creation here in New York. Miss Nore McLaren, real estate broker of Washington Square, has just received notification of her election to the Real Estate Board of New York City—which is no small honor. She is the second woman recognized in this manner by the board.

—NY—

Such commonplaces and as romantic figures and objects do sometimes reach! A lighthouse to me always is

touched with the adventurous and the picturesque more than almost anything else in the world. And here at Rockaway Beach stands one serving the most commonplace, workaday purpose imaginable. It somehow freaks of building operations or perhaps sentiment on the part of some landowner, it was left standing after it had long outlived its usefulness and is now occupied by hotels and cottages so as to be hidden from view. Children use it as a playhouse, and what is much worse, its town is the central point from which are strung countless clotheslines from the surrounding houses!

—NY—

Is it true after all that New York City is less domes than the rest of the country? I've always denied that charge, but the figures seem turning against me. Elsewhere in these United States, more people are being married this year than ever before, while here in the metropolis, times are duller than usual for license clerks and ministers. Government statistics concluded that 1921 would be a record-breaker for weddings, and they are being proved correct—except for New York. Our city's record will show at least 3,000 fewer marriages for this year than in 1919 or 1920. Cost of living? That's high in other parts of the country, too. Home shortage, maybe. Anyway the fact remains that only 56,501 licenses were issued to November first against 59,065 up to the same date last year.

I am beginning to understand why it is that the Armenian race continues to exist at all after what it has been through so many times. Maryan Heddronian and Jermek Derrian, Armenian girls of 23 and 22 years of age, arrived at Ellis Island the other day seeking for the second time admission to America. They came over last September but were refused admission because the quota was already filled for their race that month. So they were transported back across the sea, waited until they had money and courage to try it again, and here they are after 6,000 miles of additional travel, risking once more for entrance. Persistence like that could well keep a race alive under persecutions.

AMERICAN RIGHTS HELD
IN GERMAN PEACE PACT

Senator Kellogg Reviews the Specific Guarantees of Rights of This Country In Europe and Asia.

Washington.—Specific analysis of the separate treaty of peace with Germany and proof that it will insure American rights without involving us in the embroilments of Europe are presented by Senator Kellogg, of Minnesota. He says:

"Let me briefly call the attention of the Senate to parts of the Versailles treaty, under which we obtain rights, advantages, and privileges under the present treaty.

"Germany renounces in favor of the principal allied and associated powers all her rights and titles over her overseas possessions. I cannot see how accepting the benefits of the provisions of this part of the Versailles treaty can in any way involve the United

States in controversy. If we do not wish to take any part of those overseas possessions, we are at perfect liberty to renounce them. If we decide that we want any part of them, they have been made over to the allied and associated powers, and we are only one of the five, and we would necessarily have to deal with the other powers in order to obtain our rights under those provisions.

"Suppose that we should want to take the island of Yap for a cable station? Can we procure it by a separate treaty with Germany without recognizing the rights of the allied and associated powers under this treaty? We certainly cannot. I do not believe that it is the policy of this country, or should be, to take the colonies or to take mandates over any of the colonies of Germany; but we do not assume to do it; we are under no moral obligation to do it, by ratifying this treaty.

"Take Part V of the Versailles treaty. In this treaty we also accept the rights and advantages stipulated for the benefit of the United States of the Versailles treaty. Part V provides for the disarmament of Germany, limits the size of its army, the manufacture of armaments, munitions and war materials, provides for the manner of recruiting and military training, the reduction of fortifications, the size of the navy, the size and control of the air service, and provides for an international commission to enforce these articles.

"We carried on the war at great sacrifice of life and of money, in order that Germany might not again imperil the peace of the world. Are we not interested in her disarmament? Is there any reason why we should not take the benefit to us of disarming Germany so that she may not again inflict such a calamity upon the world?

"The President has called a limitation of armaments conference to meet in Washington. I know of no greater advocate of that than the distinguished Senator from Idaho (Mr. Borah). Yet the Senator would not have us join in a treaty or take the provisions of a treaty which disarms Germany, the arch criminal of the age.

"Clearly, the United States could not make a separate peace with Germany on the question of disarmament and limitation of armaments or military training. Germany could not comply with one standard at the instance of the United States and with another standard at the instance of France, Italy, Japan and England. True, we may not be interested so much in that provision of the treaty as are France, England, and Italy. Living next door to Germany, but, Mr. President, we are interested in the peace of the world; we are interested in the rehabilitation of Germany."

CHAUNCEY DEPEWS
FIRST LAW CASE.
His Fee Was One Dollar and Seventy-five Cents—Fifty-seven Years With the New York Central Railroad.

I was admitted to the bar in 1858, and immediately opened up an office in the village. My first client was a prosperous farmer who wanted an opinion on a rather complicated question. I prepared the case with great care. He asked me what my fee was, and I told him five dollars. He said: "Adollar and seventy-five cents is enough for a young lawyer like you." Subsequently he submitted the case to one of the most eminent lawyers in New York, who came to the same conclusion and charged him five hundred dollars. On account of this gentleman's national reputation the farmer thought that fee was very reasonable. In subsequent years I have received several very large retainers, but none of them gave so much satisfaction as that dollar and seventy-five cents, which I had actually earned after having been so long dependent on my father.

After some years of private practice Commodore Vanderbilt sent for me and offered me the attorneyship for the New York and Harlem Railroad. I had just been nominated and confirmed United States minister to Japan. The appointment was a complete surprise to me, as I was not an applicant for any federal position. The salary was seven thousand five hundred dollars and an outfit of nine thousand. The commodore's offer of the attorneyship for the Harlem Railroad, which was his first venture in railroading, was for less than the salary as minister. When I said this to the commodore, he remarked: "Railroads are the career for a young man; there is nothing in politics. Don't be a damned fool." That decided me, and on the 1st of January, 1921, I rounded out fifty-five years in the railway service of this corporation and its allied lines. — From "Leaves from My Autobiography," by Chauncey M. Depew, in the November Scribner's.

STALE BLOOD BLURS LIVING

Gude's Pepito-Mangan Revives the Blood to Reapply Stale.

Stale blood blurs living. It dulls the love for pleasure, and weakens the spirit. Thoughts sink into an unrecalled dreariness that no goading of the will can dispel. Where there was thrilling excitement, there is only an aching sensation of fatigue.

Gude's Pepito-Mangan taken regularly for a while puts a check to the debilitating effects of thin, watery blood. It supplies the blood with red corpuscles, steps it up to its normal, rich redness. Then it is that the pleasures of rhythmic living returns. The smouldering glow of life warms and brightens so that the pleasant sensations of eating, sleeping, walking in the golden sunshine, breathing deep the health-giving air, again become thrilling and full of delight.

Druggists sell Gude's Pepito-Mangan in both liquid and tablet form—Advertisement.

Mason County Branch of League of Women Voters To Be Organized

At the Women's Mass Meeting Here Saturday.

The question is often asked why both a Federation of Women's Clubs and a League of Women Voters, the two organizations are complementary, not competitive. The one educates, the other translates education into action.

Quite appropos, therefore, and sure to elicit careful consideration is the "notable joint letter" now being sent out, the signatories being Mrs. Thos. G. Winter, president of the General Federation of Women's Clubs, and Mrs. Mand Wood Park, president of the National League of Women Voters. The letter reads:

"There are before us at this time so many important issues that it is even more than usually wasteful of strength for women agreeing upon great issues not to get the full force to be derived from co-operation. The General Federation of Women's Clubs and the National League of Women Voters are both organizations of progressive women interested in the right development and the right conservation of our country's resources; they are both organized in each one of the forty-eight states; they are both supporting certain state and federal legislation, in many instances the same bills.

"..... Obviously, since the work of the General Federation is primarily sociological and educational, and the work of the league concerns itself with women as voting citizens, there is a good and sufficient reason for co-operation. These differences are in emphasis only and not in sharp distinction. The federation has always done legislative work, and the league is doing educational work; but the 'overlapping' should be used to promote mutual strength and understanding, never rivalry or antagonism.

"It is with great pleasure, therefore, that we, the national presidents of these two organizations, announce to our auxiliary members our mutual understanding of the value of both organizations and our earnest desire that the most cordial relations of co-operation shall exist between all state and local branches and the members in general of the Federation of Women's Clubs and the League of Women Voters, to the end that the work in which we are all interested may be forwarded with the least possible waste of effort."

In pursuance of the two-fold purpose to strengthen and train the individual woman citizen and to add strength to the advocacy of legislative measures fostered by women, the mass meeting of women at the court house at 2 o'clock Saturday is called for the purpose of organizing a Mason County League of Women Voters, a branch of the Kentucky league, which is a branch of the National league.

The meeting will be addressed by the state organizer, and the state treasurer, the president of the Fayette county league, and others. Every woman wishes to make the Mason county league one of the strongest and most efficient in the state. That is the way Mason county does things. Come, lend a hand.
